OBJECTIVE

Final-year Computer Science student with strong foundations in Java, Spring Boot, React.js, and full-stack development. Experienced in building scalable applications, designing REST APIs, and delivering clean code. Strong grasp of OOP, DSA, and Agile workflows. Passionate about solving real-world problems and contributing to impactful software.

EDUCATION

AKTU (Dr. A.P.J. Abdul Kalam Technical University)
Bachelor of Technology in Computer Science and Engineering

Uttar Pradesh, India
Expected 2026

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML, CSS, SQL
Backend Technologies: Spring Boot, REST APIs, Node.js (Basic)
Frontend Technologies: React.js, Bootstrap, Tailwind CSS
Database: MySQL, MongoDB
Version Control: Git, GitHub
Developer Tools: Postman, VS Code, IntelliJ IDEA, GitHub Co-Pilot, Bolt
Soft Skills: Curiosity, Learning Agility, Adaptability, Analytical Thinking, Collaboration

EXPERIENCE

Frontend Developer

Sep 2025 – Oct 2025

Booqin

- Built and optimized **20+ responsive UI components** using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS, improving page usability and load consistency across devices.
- Collaborated with a 4-member engineering team in Agile sprints, contributing to feature planning, peer code reviews, and sprint demos.
- Improved page responsiveness and performance by **15–20%**, ensuring consistency across desktop and mobile platforms.
- Participated in debugging sessions, unit testing, and code reviews to ensure clean, maintainable, and high-quality code.

PROJECTS

AI Email Reply Generator | *Full-Stack | Spring Boot, MongoDB, React.js*

Current

- Developing a full-stack AI-powered Email Reply Generator using React.js, Spring Boot, and MongoDB, integrating Google Gemini API with RESTful APIs and a responsive UI.
- Implementing real-time AI response generation with optimized MongoDB queries, JWT-based authentication, dynamic state management, and scalable component-based architecture for improved performance and maintainability.

BMW Website Replica | *Frontend | React.js*

2026

- Built a fully responsive BMW website replica using React.js with 15+ reusable components, dynamic routing, lazy loading, and optimized rendering for a seamless user experience.
- Achieved 35% faster performance through efficient state management, component-level code splitting, and optimized re-rendering techniques following industry-standard frontend best practices.

CERTIFICATIONS

- **GitHub Copilot Fundamentals** – GitHub
- **Data Structures & Algorithms with Java** - Apna College
