Objective

Final-year B.Tech CSE student at AKTU, graduating June 2026, aiming for a Full-Stack Developer role. Skilled in Java, Spring Boot, and React.js with hands-on experience building real-world projects including an AI-powered email reply generator.

Experience

Frontend Developer Intern — Booqin

Sep 2025 – Oct 2025

- Built and delivered 20+ responsive web pages for a live product, translating Figma designs into pixel-accurate HTML/CSS/JS using Tailwind CSS and Bootstrap.
- Identified and fixed asset loading bottlenecks using Chrome DevTools and Lighthouse, improving page performance scores.
- Collaborated in a 4-member agile team across daily standups, code reviews, and sprint demos — shipped features on schedule across a 4-week cycle.

Projects

AI Email Reply Generator

2026

Spring Boot, React.js, MongoDB, Google Gemini API

- Built a full-stack web app that generates context-aware email replies using Google Gemini API with custom prompt templates for tone (formal, casual, assertive).
- Designed a dual-layer prompt architecture — a system-level context prompt combined with a user instruction layer — to produce accurate, non-generic AI responses.
- Implemented JWT-based authentication with Spring Boot and Google OAuth2 login for secure session management.
- Stored user history and reply preferences in MongoDB to enable personalized response generation across sessions.

Job Application Tracker API

2026

Spring Boot, REST APIs, JWT Authentication, MySQL

- Built a RESTful API from scratch to track job applications across multiple stages — Applied, Interview, Rejected, Offer — with full CRUD operations across 5 endpoints.
- Implemented JWT-based authentication with per-user data isolation, ensuring each user can only access and manage their own applications.
- Developed a statistics endpoint returning real-time metrics — total applications, interview conversion rate, and offer rate — per user.
- Deployed on Render; documented all endpoints using Postman collection.

Technical Skills

- Languages:** Java, JavaScript (ES6+), HTML5, CSS3, SQL
- Backend:** Spring Boot, REST APIs, JWT Authentication
- Frontend:** React.js, Tailwind CSS, Bootstrap
- Database:** MySQL, MongoDB, H2
- AI/LLM Tools:** Google Gemini API, GitHub Copilot, Prompt Engineering
- Developer Tools:** Git, GitHub, Postman, VS Code, IntelliJ IDEA, Vercel, Render, Chrome DevTools

Education

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

2022 – 2026

B.Tech in Computer Science & Engineering
CGPA: 7.8 / 10

Certifications & Other

- GitHub Copilot Fundamentals — GitHub (2025)
- Data Structures & Algorithms with Java — Apna College (2024)
- Interests: Building projects, exploring new technologies
